## CAM FOLLOWERS

[HOME](#) >> [RANGE OF PRODUCTS](#) >> [CAM FOLLOWERS](#)
[ABOUT](#)
[BENEFITS OF CAM FOLLOWERS](#)

### ABOUT

Cam Followers are for applications where long life and maintenance-free service are essential. **Cam follower** is a good selection for machinery applications where down time is critical and must be avoided or where cam followers are not easily accessible for re-lubrication or replacement. **Cam Follower** is a compact bearing with a high-rigid shaft and a built-in needle bearing. Most suitable, as a guide roller for cam mechanisms and linear motion of automated machines & dedicated machines.

- ⦿ Cam followers having cylindrical rollers, provide substantial increases in fatigue life and limiting speed.
- ⦿ They can tolerate higher thrust loads than needle roller Cam followers.
- ⦿ Standard contacting lip seals offer protection against contaminants and positive grease retention.
- ⦿ A large internal grease cavity assures maintenance-free service.
- ⦿ Driver groove OR Hex socket in the stud head are a standard feature.
- ⦿ Spherical outer rings are available as an option.

NMTG, a Manufacturer of Mechanically Power Transmitted Products: - Keyless Transmission Elements; Freewheel-One way-Clutches; Tensioner Nuts / Bolts & Cam followers, since long.
